Experience

AI/ML Engineer Intern: ModelCat *San Francisco Bay Area (Remote), Aug 2025 – Apr 2026*

- Designed a data-efficient simulation framework for **uncertainty quantification**, utilizing probabilistic modeling and statistical estimation techniques to predict on-device model performance and reduce reliance on exhaustive hardware inference.
- Contributed to the broader ML pipeline: trained models for product demos, built internal tooling for automated dataset downloading and format conversion, and resolved various bugs across the codebase.

Reference: Vedin Klovo, vedin.klovo@modelcat.ai

Lecturer: Math School for Gifted Students *Sarajevo, 2022 – Present*

- Deliver lectures on **olympiad-level combinatorics** and advanced problem-solving strategies.
- Program participants consistently achieve medals at international competitions.

Research Intern: Max Planck Institute for Biological Cybernetics *Tübingen, Jul – Sep 2024*

- Applied **Dynamic Mode Decomposition** (DMD) to analyze zebrafish calcium imaging data, identifying functional subnetworks and spatiotemporal patterns, and demonstrated its advantages over traditional methods such as PCA and ICA.
- Selected for a highly competitive program with a **1.35%** acceptance rate in 2024.

Education

BSc in Computer Science: University of Sarajevo *GPA 8.2/10, Oct 2021 – Sep 2025*

Summer Schools

Mediterranean Machine Learning Summer School *Split, 8-12 Sep 2025*

Eastern European Machine Learning Summer School *Sarajevo, 21-26 Jul 2025*

Skills

Programming

Python (NumPy, SciPy, scikit-learn, PyTorch, TensorFlow, Pandas, PyDMD), Git, SQL, Linux/Bash, C++, LaTeX

Languages

Bosnian (native), English (C1)

Awards

Mediterranean Mathematics Competition: **Bronze, Hon. Mention, Bronze** *2021, 2019, 2018*

Federal Mathematics Competition of FBiH: Ranked **2nd, 1st, 3rd** *2021, 2019, 2018*

Scholarships & Fellowships: **Atlantbh, ZIRA, BH Futures Foundation** *2021/22, 2022/23, 2023–25*
